Art Unit: 2818

DETAILED ACTION

1. This office acknowledges receipt of the following items from the Applicant:

Papers submitted under 35 U.S.C. 119(a)-(d) have been placed of record in the file.

Information Disclosure Statement (IDS) filed on 8/21/03 was considered.
2. Claims 1-10 are presented.
3. Claims 1-5 and 7-10 are canceled.
4. Claims 6 are amended.
5. Claims 11 and 12 are newly presented.
6. Claims 6 and 11-12 are pending.

DOUBLE PATENTING REJECTION

7. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 6 and 11-12 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 and 2 of U.S.

Art Unit: 2818

Patent No. 6636437. Although the conflicting claims are not identical, they are not patentably distinct from each other because of the reasons set forth below.

Claim 6 is rejected in view of claim 1 of the 6636437 patent. Similar to the claimed invention, claim 1 of the patent recites a method of a memory device for storing data of 2 bits in one memory cell by having steps of setting the four of the threshold voltage starting from a first threshold voltage and sequentially setting the three of the threshold voltages in order of the remotest threshold voltage from the first threshold voltage, the nearest threshold voltage to the first threshold voltage, and the second remotest threshold voltage from the first threshold voltage. As can be seen, the patent protection for the claimed invention has already been granted to the earlier filed application.

Claim 11 and 12 are rejected in view of claim 1 and 2 of the 6636437 patent. Similar to the claimed invention, claim 11 and 12 of the patent recites a writing apparatus having a writing means for setting the four of the threshold voltage starting from a first threshold voltage and sequentially setting the three of the threshold voltages in order of the remotest threshold voltage from the first threshold voltage, the nearest threshold voltage to the first threshold voltage, and the second remotest threshold voltage from the first threshold voltage. As can be seen, the patent protection for the claimed invention has already been granted to the earlier filed application.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicants' disclosure. Chen (6456528) and Parker (6343033) disclose a memory device having multiple storage states.

9. When responding to the office action, Applicants' are advised to provide the examiner with the line numbers and page numbers in the application and/or references cited to assist the examiner to locate the appropriate paragraphs.

10. A shortened statutory period for response to this action is set to expire 3 (three) months and 0 (zero) day from the date of this letter. Failure to respond within the period for response will cause the application to become abandoned (see MPEP 710.02 (b)).

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to whose telephone number is (571) 272-1799. The examiner can normally be reached on Mon. - Fri. from 8:00 A.M. to 5:30 PM. The examiner's supervisor, David Nelms, can be reached at (571) 272-1787.
